This initiative is dedicated to all students attending bachelor’s and master’s degree courses organized with total or partial contribution of the educational staff of the Faculty of Agricultural and Food Sciences.

In the indicated timetable, hundred posters will be placed and will expose the research activities developed in the Faculty.

It will be an important moment in which students can:

- have a global outlook of the researches in progress in the Faculty
- dialogue directly with the protagonists of such researches (internship and doctoral students, scholarship holders, post-docs and other research workers)
- to know topics of interest for carrying out a curricular internship (thesis)
